Natural Gas Demand Response Program

Take control of your energy use.

Cut costs.

Save time.

Earn incentives.

What is the Natural Gas Demand Response (DR) Program?

Our Natural Gas Demand Response Program incentivizes you for curtailing your natural gas use during energy event days. Through your voluntary participation in the program you are paid on the overall reduction of your natural gas use. There are never any performance penalties, and there is zero cost to participate.

This zero-cost program is flexible, easy to use, and provides the ability to opt out at any time, so you're always in control.

How DR works

1

Contact us

- Set up a zero-cost, no-obligation custom energy survey.
- A program representative will come to your site to discuss the program and conduct the survey.
- We will work closely with you to determine your optimal load reduction strategies.

3

Participate in Demand Response Events

- You will receive notification up to 24 hours prior to event via text and email.
- You have the flexibility to determine your reduction strategy. We will not have direct control of your equipment and/or building control systems.

2

Enroll

- You review identified measures and sign a contract agreement.
- Demand reduction strategies will be programmed.
- You approve final project and start participating in the program.

4

Earn incentives

- You can receive up to \$10 per CCF of load relief per 24-hour event.
- Incentives are 100% performance based.

Want more information on how to participate and what you could potentially earn?
